

SANNI CHAUDHARI

Full Stack Developer (Node.js / React)

📍 India | ✉️ chaudharisunny6@gmail.com | 🌐 **GitHub:** github.com/chaudharisunny |

🌐 **LinkedIn:** linkedin.com/in/chaudharisunny

Professional Summary

Full Stack Developer with strong backend expertise in Node.js and working knowledge of React.js. Experienced in building scalable RESTful APIs and backend systems using Node.js, Express.js, and MongoDB. Skilled in authentication, role-based access control (RBAC), API security, and modular architecture design. Passionate about writing clean, maintainable code and continuously improving application performance and reliability. Comfortable working independently and collaborating in remote team environments.

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js

Backend: Node.js, Express.js, REST APIs, JWT Authentication, RBAC, Middleware, MVC Architecture

Databases: MongoDB

Security & Performance: JWT, bcrypt, CORS, Input Validation, Error Handling

Tools & DevOps: Git, GitHub, Postman (API Testing), Vercel, Render, MongoDB Atlas

Project Experience

Fire & Safety Management Web Application (Frontend)

Live Demo: <https://fire-andsafety.vercel.app/>

- Developed a responsive frontend web application using React.js
- Implemented reusable components and modern UI using Tailwind CSS
- Integrated frontend with backend APIs for dynamic data rendering
- Ensured responsive design and cross-device compatibility
- Deployed the application using Vercel

Hospital Food Delivery Management System (HFDM)

GitHub: https://github.com/chaudharisunny/Hospital_Food_Delivery_Management_System_Backend

- Designed and developed a backend system using Node.js and Express.js with modular REST API architecture
- Implemented JWT-based authentication and role-based access control for Admin and Patient roles
- Built CRUD APIs for patients, diseases, allergies, rooms, meal plans, and pantry management
- Integrated MongoDB Atlas and optimized database queries for improved performance
- Deployed backend using serverless functions on Vercel

Job Management REST API

GitHub: <https://github.com/chaudharisunny/JobManagmentRestApis>

- Developed scalable REST APIs for job posting, job applications, and applicant management
- Implemented advanced filtering, search, and pagination using MongoDB queries
- Secured endpoints using JWT authentication and admin authorization
- Managed relational-style user-job data for efficient frontend consumption
- Followed clean code practices and Git-based version control

Education Bachelor Of Engineering In Information Technology 2021
